

0020 PUMP CONTROL VALVES

0020 Pump Protection Control Valve The 0020 valve regulates the pressure level during the start and shut-off of a pump to protect the pumping assembly and the downstream network. The valve protects the booster pump and its engine by sustaining the pressure in starting and shutoff. 0020 is connected electrically to the pump's control panel.

TECHNICAL SPECIFICATIONS

Valve	EN-GJS400-15
Accessory	Stainless Steel, Brass, Bronze
Piping	Stainless Steel Pipe, Steel Braided Hose (DRG)
Limit Switch	Standard Roller-Type

APPLICATION AREAS

1

Drinking Water

2

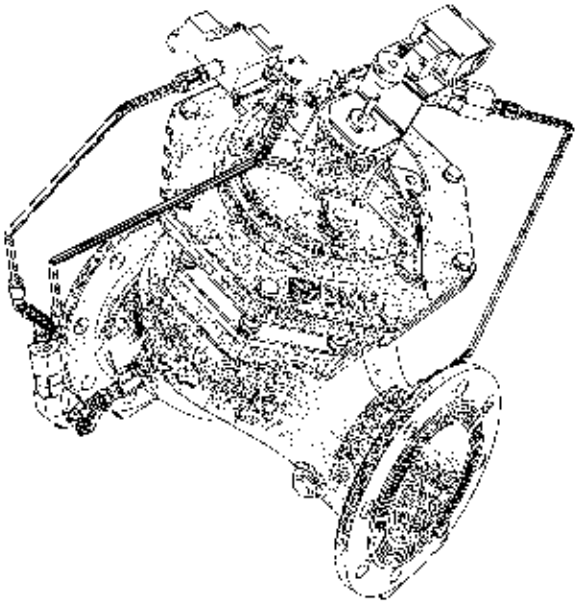

Industrial

3

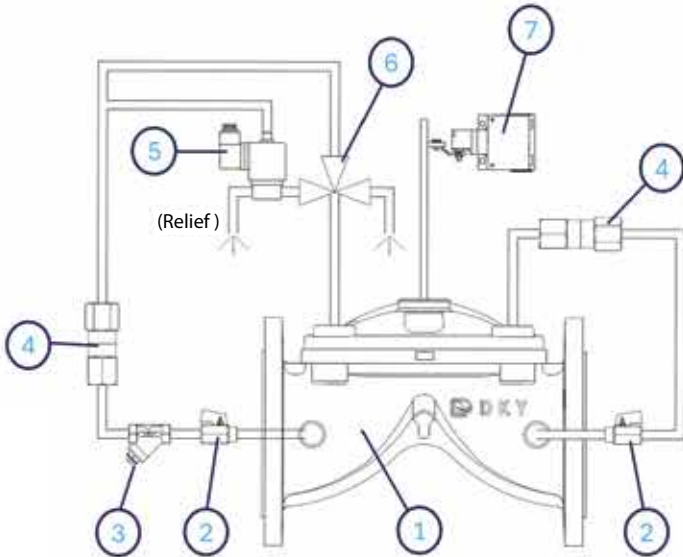

Irrigation Systems
